OSACO
MAKE A DIFFERENCE

TRANSPARENT. VERIFIABLE. ACCOUNTABLE.

THREE BIG WORDS THAT HAVE NEVER MATTERED MORE IN BUSINESS, FINANCE & PUBLIC SERVICE.

OSACO Partners are specialists in compliance, governance, safeguarding and anti-corruption systems. We bring our extensive toolkit of experience, expertise and clean business practices to help your organisations anticipate corrupt behaviour by staff, management, or at government level and tackle it effectively.

WHAT WE DO

We work with organisations and businesses of all kinds and all sizes including commercial, financial, public sector, not-for-profit, and sports.

New Zealand is one of the highest ranking countries in Transparency International's corruption perceptions list, but that shouldn't be taken for granted.

Corrupt behaviour doesn't have to be large scale or involve millions of dollars hidden in secret bank accounts. Corrupt behaviour is anything that isn't honest. It can slip into a business incrementally and grow.

Small incidents of bad behaviour such as misusing the staff petrol card, forgetting to hand over the shared company cell phone, or inappropriate comments and behaviour in the workplace can build up and create a toxic organisational environment.

ACCOUNTABILITY FOR BEHAVIOUR

For organisations and companies to operate well, we need to change our way of thinking. We need to lower the threshold of tolerance for what is seen as inappropriate but not criminal behaviour and to recognise an action as an example of 'corrupt' behaviour.

Sometimes good people do bad things because the opportunity exists, and there is no robust accountability mechanism.

We help businesses and organisations to implement compliance, anti-bribery and anti-corruption systems to not only safeguard their organisation and stakeholders but also to enable businesses and organisations to prosper that they operate in a clean, transparent and ethical way.

ANTICIPATE & PROTECT

We help businesses and organisations to put systems in place so that people are confident enough to report incidents and have confidence that issues they raise will be fully dealt with using a robust and independent process.
